

# ROCKAWAY

## SUPER DUTY LANDSCAPING TOOL

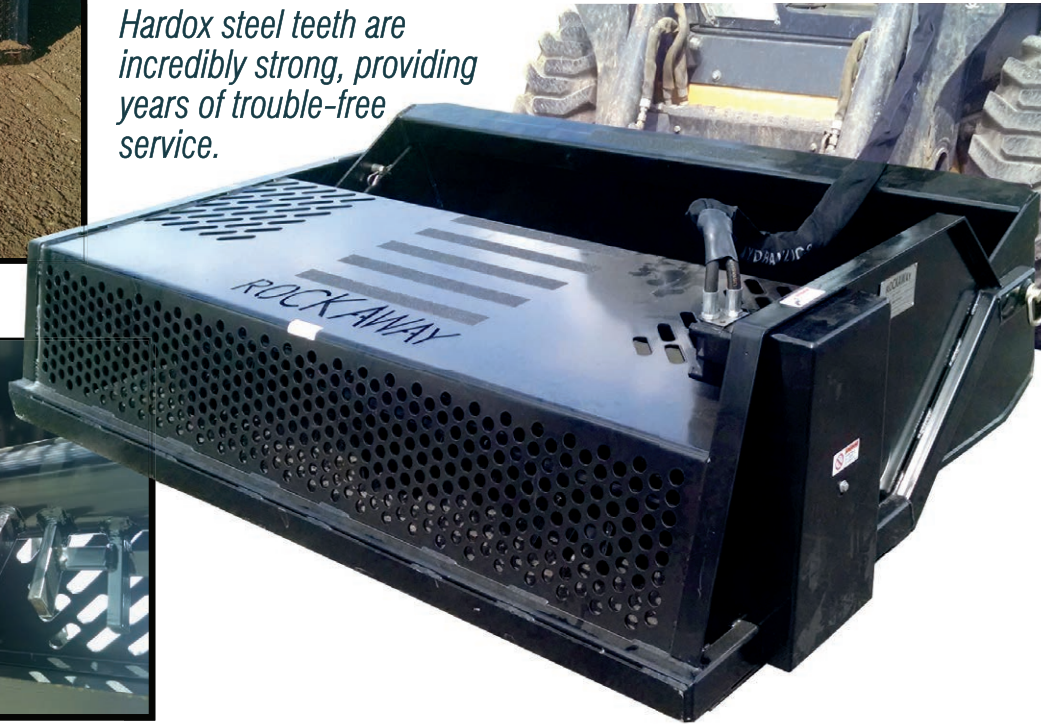

***FINELY-GROOM SEEDBEDS FROM HARD, STONY GROUND EASILY, & WITH LOW MAINTENANCE!***

*Affordable, low maintenance, quality landscaping tool for virtually any skid-steer loader. ROCKAWAY picks rocks in reverse, but can also push small amounts of dirt moving forward. Low profile makes visibility excellent!*

*You won't dump your bucket often. When you do, you'll dump mostly rocks.*

*Hardox steel teeth are incredibly strong, providing years of trouble-free service.*

### ***ROCKAWAY BENEFITS***

- *Spiral-mounted teeth pull material toward the center, helping avoid dirt trails.*
- *Low maintenance - just two greaseable bearings and one #80 roller chain.*
- *Easy to install on loader buckets and easy to remove - just two pins and two hoses.*
- *The same Rockaway can be used on several different buckets, if buckets are modified.*
- *Takes up less trailer space than the competition.*

# ROCKAWAY

## TESTIMONIALS

*"My Rockaway took a little time to get used to; I was accustomed to dumping so much more often with my RockHound landscape rake." - a satisfied customer*

*"If all competitive rock pickers were the same price, the Rockaway would still be the one I would buy. Simple to operate, run longer before dumping, and you can grade with it." - Northern PA contractor*

*"I could buy two Rockaway units for almost the same price as one RockHound landscape rake, with more room on my trailer; the Rockaway takes up less space." - MD contractor*

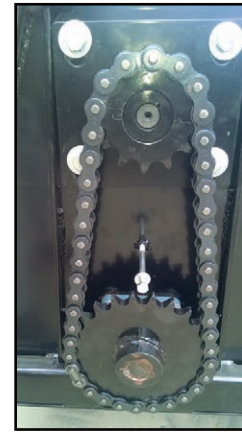

*"The Rockaway does as good a job as my Preparator™ landscape rake, and I can cover three times the territory before dumping. That saves time. When I do dump, there are more rocks and less dirt." - Western PA contractor*

## NEW SUPER DUTY IMPROVEMENTS

A rubber protecting flap now hangs 8" to 10" into the bucket.

The rotor shaft has been enlarged from 1 1/4" in diameter to 1 3/8" diameter with heavier duty, 1 3/8" bearings. Rotor has been re-designed with a bolted hub for easy service.

New larger #80 drive sprockets & chain increased from #60 for added strength & longevity.

New, stronger hood design with slotted holes. The center area is now solid steel to reduce dust and add strength. Hoses are now covered with protective material.

Tube frame has been increased 50% from 1/8" to 3/16", heavier for durability.

A front push bar 3/8" thick has been added to increase strength and provide a wear area when pushing soil forward.

3/16" Stainless steel wear runners have been added to the bottom of both sides of the frame.
